Education

Python - Data Science Certificate Mar. 2016 - Jun. 2016
The Iron Yard, Durham, NC

Bachelor of Arts in Geographic Analysis, Minor in Marketing Sept. 2009 - Jun. 2013
Ryerson University, Toronto, ON

Projects

Dripping with Data with Daimler Trucks North America Jun. 2016

Objective was to show real time information including graphs where managers can view it at a glance.

- Used Django Framework to create a data dripper to help simulate live data and events.
- Constructed a high level dashboard using JavaScript, D3 and NVD3 for at-a-glance view.
- Created an API to access saved event information in order to show historical data for managers to make comparisons to find problem areas and make improvements.

Canada-Wide Geographic Entrepreneurship and Consulting with Bureau of Broadcast Measurement (BBM) Jan. 2013 - Apr. 2013

Worked with BBM (now Numeris) to create a methodology to evaluate, update and optimize the boundaries of BBM's current radio markets to ensure all markets are reached.

- Explored, organized and cleaned Industry Canada's AM/FM contour and station tower locations to ensure all BBM member station have information attached.
- Communicated any inconsistencies to BBM to ensure quality before moving on to mapping.
- Assisted in the creation of maps using MapInfo in preparation of analysis.
- Analyzed BBM's radio markets through a number of criteria to see whether the market needs to change its boundaries.

Work Experience
